HEXOMETRY

A PATTERN BY SARAH THOMAS OF SARIDITTY

HEXOMETRY

BY SARAH THOMAS • FINISHED SIZE 53"X62"

MATERIALS

- One pack each of Me+You precut hexagons: MYHEX-639-HONEST and MYHEX-637-SIMPLE
- Batting & Backing: 3 1/2yds each
- Binding: 1/2yd

Please read entire pattern before beginning. All seam allowances are 1/4". Press seams open. The template below can be used to cut half hexagons from any fabric you wish if not using Me+You precuts.

CUTTING

Slice each precut hexagon in half from point to point. You will start with 80 hexagons using the Me+You precuts, yielding 160 half hexagon cuts.

ASSEMBLY

Separate Me+You hex halves into two stacks: solids and prints (80pcs each). Using the finished quilt photo on the cover, layout the hex halves in color arrangement matching, or similar, to the quilt shown. Solids are on the right side of each full hexagon, and prints are on the left side. If using various fabrics, arrange as you wish.

The full layout using Me+You precuts yields 16 columns with 10 hex halves in each column.

ASSEMBLY *continued*

Sew together columns. Starting with column one, place two half hexagons right sides together along an angled edge with a 1/4" overhang on each tip. Stitch along edge (FIG. A). Two half hexagons should look like FIG. B after piecing.

Repeat these steps, adding one half hexagon to the column strip each time until the entire column is pieced. Each strip should alternate solid-print-solid-print if using the Me+You precuts. Set aside. Repeat with columns 2-16.

Once all columns are pieced and pressed, sew columns together. Pin at each seam — match up to guarantee proper hexagon alignment.

Quilt and bind as desired. Have fun with the quilt perimeter to include a few hexed border pieces jetting out when you trim and square.
