CALIFORNIA-INTERNATIONAL FABRICS

JINGLE POPS

2-1/2" wide strip sets. 40 different fabrics in each. Laser cut. Featuring fall, winter and holiday-themed screenprints, each fabric shimmering with metallic accents.

Hexagon Table Topper

#JP3 28-Silver

Style #JP3- 47 Gold

Finished size approx. 50" x 58"

Design and instructions
by Linda Ambrosini.

Jingle Pops

Large Hexagon Table Topper

Finished Size 52 inches across parallel sides

By Linda Ambrosini

Fabric Requirements:

- 1 Jingle Pop in Gold or Silver Metallic
- 1 Fat 1/8th for center hexagon
- 5/8 yard binding cut at 2 1/4 inches
- 2 7/8 yard backing fabric

Cutting: Center a unique motif for the center hexagon using the template given. Make sure that the hexagon measures 4 1/2 inches across, between the parallel (dotted outside lines) sides on the template. Sometimes in copying, or downloading from a computer, the equipment is not set at 100% and variations occur.

The rest of the table topper is made from your Jingle Pop, all the strips are already cut to 2 1/2 inches. We will just be cutting lengths to sew to each side. Keep some of your favorite fabrics for the outside edges as they are the longest and show the most.

Topper Construction: Measure the length of one side of the hexagon. I get 2 5/8 inches, add 3/4 of an inch to the measurement to compensate for the angled seam allowance. I am going to make my life easy and cut a 3 1/2 inch (yes, a bit larger but an easy measurement) length from one of my Jingle Pop strips. In the quilt photo this fabric has a white background with little red berries, you may choose any fabric, I am just giving you some orientation. Center this 3 1/2 inch piece to one side of the center hexagon and sew it on. Press the seam allowances towards the center.

Now we need to create an angle on the right hand side of our sewn piece. Place your ruler's edge on the center hexagon's side that intersects your seam allowance on the right. Cut away the excess of your sewn 2 1/2 inch strip as well as creating the angled cut. Repeat this same procedure on the left hand side of the sewn strip.

Next add a strip to the right hand side of that sewn strip. Measure the length of that side, the angled cut of the sewn strip and center hexagon.

I get 5 inches, add $\frac{3}{4}$ of an inch and cut a piece of fabric $5\frac{3}{4}$ inches long. In the quilt photo this would be the black background with the gold metallic swirl. If your seam allowances are a bit different than mine you will get a slightly different measurement than 5 inches, just add $\frac{3}{4}$ of an inch or the next simple measurement to cut. Remember we will establish the angle by cutting away fabric so this step does not need to be exact. There is a plenty of fabric in your Jingle Pop to complete this project. Center the strip cut and sew in place. Press the seam allowance to the center and create the angles on both edges of the fabric strip....just like you did before.

We will continue around the center hexagon in a clockwise direction, by measuring each side, adding at least $\frac{3}{4}$ of an inch to that measurement, sewing the strip in place, pressing the seam allowance to the center, and then establishing the angles cuts. This is repeated until you have circled the center hexagon completely 12 times.

I did check the accuracy of my angle cutting every few strips by using the 60 degree line on my ruler and adjusting the cut to keep the hexagon true.

Quilt and Bind.

Happy Holidays!
